

# RUDOLFH LABAY MAZON

**Full-Stack Developer** | 3+ Years Experience | Open to Remote & International Roles | Available Immediately  
[rgmazon@gmail.com](mailto:rgmazon@gmail.com) | +63-952-475-4587 | [linkedin.com/in/rgmazon](https://linkedin.com/in/rgmazon) | [rgmazon.pages.dev](https://rgmazon.pages.dev)

## PROFESSIONAL SUMMARY

---

Full-Stack Developer with 3+ years of experience building production web applications across diverse tech stacks. Proficient in React, Next.js, TypeScript, Node.js, PHP/Laravel, and PostgreSQL/Supabase. Proven ability to improve performance, migrate legacy systems, and ship full-stack features independently. Experienced with third-party integrations, REST API development, and cloud deployments on Vercel, Cloudflare, and Cloudways. Actively seeking junior to mid-level remote opportunities.

## TECHNICAL SKILLS

---

Languages: JavaScript (ES6+), TypeScript, PHP, HTML5, CSS3

Frontend: React.js, Tailwind CSS, Bootstrap, Vite

Backend: Node.js, Laravel, PHP, REST API Development

Databases: MySQL, PostgreSQL, Supabase

Tools: Git, Github, Figma, npm/pnpm, Chrome DevTools, Docker

Cloud & Deploy: Vercel, Cloudflare Pages, Github Pages, GCP(VM), Cloudways

## PROFESSIONAL EXPERIENCE

---

### Full-Stack Developer | Freelance Contract

Mar 2026 – Apr 2026

*Tech: HTML, CSS, JavaScript, Node.js, WordPress, Cloudways, Meta Pixel, Everflow, Jornaya, TrustedForm, Firebase, RedTrack*

- Migrated 3 lead generation websites from GoDaddy to Cloudways, improving server response times and deployment reliability.
- Rebuilt WordPress-based marketing funnel sites with custom-coded solutions, boosting Google Lighthouse performance scores from ~20 to 90+.
- Integrated and configured tracking stack including Meta Pixel, Everflow, Jornaya, TrustedForm, Equifax, and Microsoft Clarity for accurate lead attribution.
- Conducted end-to-end QA and debugging across authentication flows (Firebase OTP) and third-party form submission pipelines.
- Produced technical documentation and deployment guides to enable seamless team handoffs.

### Full-Stack Developer | Fliquey Media Entertainment

Feb 2025 – Present

*Tech: Laravel, Bootstrap, MySQL, Smarty, React.js, JavaScript, Tailwind CSS, WordPress*

- Contributed to a Laravel/PHP streaming platform and a PHP/MySQL social media platform, developing messaging, content management, and engagement features.
- Built an admin leaderboard dashboard tracking registrations, user engagement, and platform revenue metrics in real time.
- Improved newsfeed performance by implementing asynchronous video loading and caching strategies, reducing render-blocking requests.
- Led frontend migration from legacy PHP/Smarty templates to modular React.js components, improving maintainability and scalability.
- Authored and maintained internal REST API documentation to support frontend and mobile client integrations.

### Full-Stack Developer | blaseek

May 2024 – Jan 2025

*Tech: React.js, Vite, Tailwind CSS, PHPMailer, Email JS, Figma*

- Designed and launched a production React/Vite website, replacing a legacy static site and establishing a modern component-based architecture.
- Achieved significant page load improvements through code splitting, build optimization, and WebP image delivery.
- Migrated contact form infrastructure from PHPMailer to EmailJS, increasing submission reliability for client lead inquiries.

- Built a reusable React component library to standardize UI patterns and accelerate feature delivery.

### Full-Stack Developer | Freelance

Aug 2022 – May 2024

Tech: WordPress, PHP, MySQL, React.js, Bootstrap, Tailwind CSS, JavaScript

- Developed and deployed 5+ web applications and business websites using PHP, MySQL, React, and WordPress for small business clients.
- Built backend systems including form processing, database storage, and admin dashboards for managing customer inquiries and internal data.
- Delivered responsive, SEO-friendly landing pages using structured HTML and performance-focused UX practices.
- Improved site performance through image optimization, caching strategies, and frontend refactoring.

### Front-End & Database Developer | Internship

Sep 2023 – Jan 2024

Tech: HTML, CSS, JavaScript, PHP, Bootstrap, Figma, Github, MySQL

- Built responsive internal administrative dashboards using Bootstrap, PHP, and MySQL.
- Refactored inefficient SQL queries, improving dashboard data retrieval performance.
- Developed reusable UI components deployed across multiple government administrative modules.

## PERSONAL PROJECTS

---

### Follo – Job Application Tracker | <https://follo-phi.vercel.app>

Tech: Next.js, TypeScript, Supabase (PostgreSQL), Supabase Auth, Tailwind CSS, Vercel

- Built a full-stack application enabling job seekers to track applications, recruiter contacts, and hiring pipeline progress.
- Implemented secure authentication and per-user data isolation using Supabase Auth and PostgreSQL Row Level Security (RLS).
- Created automatic activity logging via PostgreSQL triggers, generating timestamped records on application status changes.
- Developed Next.js middleware for server-side route protection and session validation.

### Grave Locator – Geospatial Web App | <https://grave-locator.pages.dev>

Tech: React.js, Supabase (PostgreSQL + PostGIS), Mapbox GL JS, Tailwind CSS, Vite, Cloudflare Pages

- Built a map-first geospatial web app for locating and submitting graves via an interactive Mapbox interface.
- Stored and queried geospatial coordinates using PostgreSQL with PostGIS extension.
- Implemented a moderation workflow requiring admin approval for all public submissions and edits.
- Developed an admin dashboard for reviewing, approving, and rejecting user submissions.

### NLNP-PAMO Online Permit Management System

Tech: PHP, MySQL, Bootstrap, dompdf

- Designed and built a permit management platform replacing manual paper-based workflows.
- Implemented automated PDF permit generation using dompdf, triggered by application status updates.
- Developed a real-time admin dashboard for tracking permit processing across departments.

## EDUCATION

---

### Bachelor of Science in Information Systems

Jan 2020 – Jun 2024

Specialization: Systems Design and Web Development

City College of Calapan

## CERTIFICATIONS
